

## FULL STACK WEB DEVELOPER

# 

I am a Full Stack Web Developer with a strong background in PHP and JavaScript ecosystems, experienced in both backend and frontend development. I have contributed to the design, implementation, and evolution of CMS, CRM, and custom backoffice tools for a wide variety of sectors.

I have developed tailored solutions using a variety of technologies, including PHP and JavaScript modern frameworks and WordPress. I have worked with Clean Architecture, microservices, and SOLID principles. My work includes building APIs and Backoffice tools, modernizing legacy codebases, creating custom Wordpress plugins, and integrating third-party services.

Throughout my career, I've worked in both agency environments and as a freelancer, collaborating with crossfunctional teams to design, build, and scale solutions adapted to real-world business needs.

I am highly committed, proactive, and team-oriented. I bring not only technical contributions but also a strong sense of collaboration, responsibility, and continuous improvement. Colleagues often highlight my positive attitude, adaptability, and ability to make work enjoyable and effective within the team.

I am currently seeking a stable position in an environment where I can improve my professional skills and contribute my best.
